

Kentucky Manufacturing VIN Code

Sections	1			2					3	4							
	1	K	K	V	F	4	0	2	0	B	L	0	0	0	0	0	1
Digits	1	2	3	4	5	6	7	8	9	10	11	12	13	14	15	16	17

Section 1 – Consists of the 1st through 3rd digits, and will always be **1KK**, which is Kentucky Manufacturing Company assigned World Manufacturer Identifier.

Section 2 – Consists of the 4th through 8th digits.

4th digit will be alpha and will indicate the type of vehicle as shown:

B=Body D=Dolly P=Platform V=Van

5th digit will be alpha and will indicate the model as shown:

A=Dry Freight	F=Furniture	P=Pole
C=City Delivery	G=Grain	R=Refrigerated
D=Drop	H=Open Top	S=Special
E=Electronics	L=Livestock	T=Trailer Chassis

6th and 7th digits will be numeric and will indicate the length of the vehicle to the nearest foot.

Example: 40ft vehicle, 6th and 7th digits would be **4** and **0**.

8th digit will indicate the number of axles.

Example: Tandem axle, 8th digit would be **2**.

Section 3 – Consists of the 9th digit only, and will always be used as the check digit. The check digit will be assigned per FMVSS 565.25.

Section 4 – Consists of the 10th through 17th digits.

10th digit will indicate the model year, and will be assigned per FMVSS 565.25.

11th digit will be alpha, and will indicate the plant of manufacture as shown:

L=Louisville, Kentucky

12th through 17th digits will be numeric, and will indicate the production sequence for each year's production, regardless of body type. The starting number will be assigned in a straight numerical sequence.
